

Water is a mirror which reflects your spirit...

the Message of water is:

"look in yourself! ... "

the effect of your thoughts on the water of your body, since you are composed of 65 % of water...

This book of frozen water crystal photographs, (subtitled in English and Japanese) presents a technique to us very simple discovery by Dr. Emoto.

This work not only makes it possible to evaluate the degree of purity or pollution of various water of the tap, lakes, sources and rain, but confirms also the "memory of water". They make it possible to visualize the effects of various energies on water (external and interior since we of it are made up to 65 %), of most known (electromagnetic radiations, music, etc.) with most subtle (like the energy of the words, of the forms and the thoughts!).

Its work confirms that water thus reacts to all information, positively or negatively. This is why Emoto subtitles its work: "the message of water invites us to look in us".

Here first crystal images of ice...
and they give us a capital message! ...
Here some images of its splendid book:

Water out of bottle is placed between 2 loudspeakers.

Music of Bach: Goldberg Variations

	<p>Songs of Sutras Tibétains</p>
	<p>"Music" or rather "Noise" of Heavy Metal (music of "young person" of the style Hard rock power 2)</p>
	<p>After the 3 Crystals of "Sound" above (music),</p> <p>Here 2 Crystals coming from water contained in a small bottle (visible in bottom on the right of the image) with a label on which one wrote the words:</p> <p>"You return to me sick, I wants to kill you!"</p>
	<p>Small bottle (visible in bottom on the right of the image) with a label on which one wrote the words:</p> <p>LOVE, appreciation...</p>
	<p>Spring water of spring receuillit with Nagasaka (Japan)</p>

In the book 150 Photographs which tell us long bus of it one visualizes very well the difference between a "Angel" or a "Demon", "Mera Thérésa" or "Hilter"...

Difference between "does it!" ("C it "is an order (pub...)) and " Let us do it... " (much respectueux...)

You can order these 2 splendid works of 145 pages out of glazed paper with more than 150 photographs color, at Alternature, 33 street Acklin, 68440 Landser > > > SEE details and price at the foot of the page...

Water addresses a message to us!

Will we be able to hear it and hold account of it?

What goes from oneself since centuries for energy medicine remains disputed still nowadays by the mediums (known as) scientific of "the Establishment":

Water is sensitive to information...

But the truth is like water, one cannot retain it indefinitely.

In general, of the researchers who seek, one finds some, but researchers who find, one seeks some! And well, Masaru Emoto found, him, a technique simplissime to highlight qualities of water.

It thus brings from there not only to the mill of Benveniste and its famous "memory of water", but also of Hahnemann and all the homeopaths and the million people who did not wait besides until "official" medicine comes assure them that their energy therapies henceforth had "the right" to function!

Indeed, thanks to the discovery of Emoto, it is now clear "as of the water of rock" which one can give of information to water! ...

The message of water

Its technique: one makes it freeze and one photographs his crystals. Still simpler than significant crystallization! Not only, they translate the degree of purity of various water of the planet, which they are tap, of rain or rivers, but show in a "speaking" way very that the music the influence also.

The distilled water of a bottle placed between loudspeakers will let see, once frozen, very different crystals according to the music to which it was subjected. What a beauty with the classical music! It is included/understood why Mozart, Bach or Beethoven, inter alia, delight us. It is because our body water reacts directly to these harmonies. The symmetrical and developed hexagonal structure shows it, whereas after "heavy metal", not of hexagon! An amorphous structure replaces these true jewels!

Emoto went even further, because it confirms that all is energy. Einstein had said it to us, Emoto shows it to us! The words, the words, the feelings and even the thoughts, influence water. With this intention, it sticks labels with words on distilled water bottles and notes their effect on the crystals. How with the music, a "negative" word involves a dysharmonieuse crystallization, whereas "thank you" or "Love", some is the language, form splendid images! All is seen, without artifice, directly! Water, in fact, commits us to look in ourself. We cannot henceforth any more, throw would be this only one idle talk, without knowing that it will not remain without consequence, on the other, as on us! Emoto offers to us here a book of photographs to be seen and make known!

Michel Parra, 23.05.2001

PS: the French translation is available

PS 2: Emoto has just founded an institute in Switzerland, WISE CRYSTAL, and sees personalities such as Ruppert Sheldrake joining it!

L be 2 Books of 145 pages and 150 Photographs colors (glazed paper!) The message of water are available near Alternature, 33 street Acklin, 68440 Landser courrier@alternature.com

flight 1 costs 41 € (translation & port included/understood) in English and Japonnais and the French translation (booklet) is available

flight 2 costs 37 € (port included/understood) translation to come in March 2002
per 4 €

Water is one to mirror which reflects your spirit...
