

:Global-Pulse-Colloidal-Elements.

These **Colloidal-Elements** are formulated in ultra pure energised water using high voltage technology and the use of pure electrodes of the **Gold, Copper, Silver, Iron, Zinc, Magnesium &** other elements.

The Colloidal component is fifty percent of the element discharged into the water, in nano-metre particle size. Each particle has its own positive charge-so they repel from each other, therefore staying in total suspension when stored as directed. Do not refrigerate or place near magnetic fields.

When the mineral particles are this small, they can slip right into the cell membranes without any need of help. So the delivery system of these **Colloidal-Elements** is ultra efficient at the cellular level.

First, lets make it clear,: these Colloidal Minerals (Gold,Silver Copper and others),are NOT the same Gold, Silver or Copper of ancient times or even that of modern medicine's use in the past. It is only in the last 8 years that researchers have been able to produce absolutely pure, untainted, mineral Colloids without additives..

NOTE: before this, any reference to Silver, Gold or Copper, would mean a rather 'dirty' compound of salts, sulphate, nitrate or chloride. Any substance like that can be toxic, unlike these safe colloids.

However, the most important use of these modern, true Colloidal elements is to **STRENGTHEN THE IMMUNE SYSTEM** and to **OPTIMISE OUR DNA POTENTIAL**.

:Colloidal-Gold, helps with relief of pain associated with arthritis, rheumatism, rheumatoid arthritis. Gold appears to remove blockages, assists with poor circulation and tissue regeneration of the heart, spleen, pancreas and muscles. It can also stimulate the pituitary and pineal glands and improve the absorption of nutrients. It stabilises collagen, inhibits or releases enzymes as required, and stimulates the nerves, assists with digestion and helps with addictions, clinical depression and brain fog. Gold helps the right/left brain balance and possesses remarkable sedative and meditative properties,

:Colloidal-ZINC , aids in the proper assimilation of vitamins, normal growth and development, maintenance of body tissues, sexual function, immune system, chemical detoxification and synthesis of DNA. Zinc helps reduce healing time both before and after surgery. Zinc is anti-bacterial, anti-viral and is found in all the body fluids, including fluid in the eyes, lungs, nose, urine and saliva .It is essential in prostate gland function and the growth of the reproductive organs.& may help prevent acne and regulate the activity of all glands. A significant amount of zinc is lost through perspiration. Zinc levels are reduced by grains and wheat consumption.

:Colloidal-Copper, seems to be an essential trace element. Necessary for the absorption & utilisation of Iron; helps oxidise Vitamin C and works with Vitamin C to form Elastin ,Copper aids in the formation of red blood cells and helps proper bone formation & maintenance.

Over the centuries, copper has been reported as a beauty aid, known as the **FOUNTAIN OF YOUTH**. "It helps arthritic pain, is anti-inflammatory ,may relieve cramps, flu and viruses, fatigue, psoriasis and coughs. Copper is traditionally associated with arthritis and rheumatism and a deficiency can result in grey hair, skin wrinkles, including crow's feet, varicose veins and saggy skin.

:Electro-Colloidal-Silver, appears to be a powerful, natural Germicide against infections. Silver nano-particles are long-lived in the body because they do not enter into a reaction, but act catalytically. Silver, as a catalyst acts on the enzyme or 'chemical lung' that transfers oxygen and nutrients through the cell walls of the disease-causing-organisms so the organism suffocates. Silver has been used as a water purifier since 1900 and since the 1930's Silver has been used to impregnate water filters to kill germs in water or which might grow in the filter medium .Prior to 1938, colloidal silver was used by physicians as a mainstream antibiotic treatment and was considered quite "high-tech." It has also been shown to assist in stem cell development and growth.

:Colloidal Sea Minerals Concentrate. Why are minerals of such importance?

Minerals can create a healthy environment in which the body, using vitamins, proteins, carbohydrates and fats, can grow, function and heal itself. Lacking any minerals can lead to degenerative diseases of many kinds as well as a breakdown of the cell regeneration and growth process, which leads to the loss of the cells themselves. This can lead to nervous disorders, muscle damage, brain damage or illness. A deficiency of minerals has been traced to low energy, cancer, un-necessary ageing and obesity, loss of memory, immune system dysfunction, fragile teeth and bones. Some vitamins can only be made available to the body if minerals are present to work with. Vitamins alone have been found ineffective in the absence of minerals. :Global-Pulse Sea Minerals have been shown to help with insomnia and in hydration of the body. Organic stevia is added to balance blood sugar levels and aid the pancreas.

:Probiotic Formula, these are beneficial microbes. This formula uses over 100 herbs and nutrients combined and fermented for intestine and immune health vitamin B. This probiotic assists with bloating, wind, liver function, the elimination of toxins and helps with creating a good environment in the gut for proper absorption and digestion of nutrients. The formulation appears to help clarity of thought and digestion and with overall energy levels.

:Stabilised Electrolytes of Oxygen, SEO.-purifies & detoxifies drinking water in 30 seconds. Increases energy levels in the body, assists in rejuvenation & health of skin cells & improves digestive function. It can break down excess toxins & bacteria in the body & colon. SEO strengthens the immune system, may reduce blood pressure, diabetic disorders-sinus,eczema,asthma, cold sores & skin cancer as well as colds and flu. With colloidal-silver helps treat Candida and Giardia. Bacterial and viral replication is not possible with the presence Oxygen, Silver, Copper, and Zinc

:Colloidal Magnesium, helps to regulate the body's nerve and muscle tone and has a role in tooth and bone hardness. It may aid the metabolism of proteins, fats and carbohydrates as well as the maintenance of healthy blood pressure and as a catalyst in enzyme activity. Cramps and irritability as well as twitching, dizziness and mild depression can be symptoms of a lack of magnesium. It may also assist premenstrual tension and correct PH balance and the uptake of potassium and calcium.

These colloidal elements are supplied with focus and love for the potential benefits to help the body's own Immune system gain the energy for the remedy.
