. In western medicine, Platinum is used to treat cancer. It can be used to stimulate the health of the eyes, bringing the eyes to an improved condition and an overall clarity of vision is noticed. Platinum also provides a connection with the cellular structure of the physical body and activates, in the memory of each cell, the recognition of the healthy condition and the processes required to maintain that condition by stimulating the immune system; once the cells understand, they may effectively function to dispel disorder within their structures.

Colloidal Platinum also assists in correct functioning of the digestive tract, and in the better assimilation of nutrients as it is known to help in the absorption of other vitamins and minerals into the body.

It is a DNA Booster and a helpful Rejuvenator of Life Force Energy, which is compromised by exposure to many toxic elements of the 21st century, both material and emotional. Colloidal Platinum is documented as one of the major rejuvenators of the life force, working deeply with the DNA of the cell to create an internal environment necessary for the body to help reverse degenerative conditions. It also helps to produce a specific harmonic frequency that optimizes DNA function and helps the body correct degenerative states in many areas, such as auto-immune types of imbalances. It also helps to raise the overall resonant harmonic frequency of the cell.

The natural elements of the energized water contained in this formula are known for their role of energy production in the body, it helps hold and stabilize the electromagnetic frequencies and patterns specific to the vibration of Colloidal-Platinum.

When the DNA of the cell is vibrating at it's optimal frequency, experiences similar to mild Clairvoyance may occur, vibrating with a dance no disease can dance to - so the body remains in a state of balance and optimal health.

Platinum aids in regenerating the heart tissue, thymus and the entire endocrine system and It increases the electrical transmission across the synapses within the brain. All the vertebrae are aligned, and there is an increase in regeneration and the efficiency of information received throughout the entire neurological tissues. There may be an easing of the petrochemical and tubercular toxins, and there is improved absorption of all nutrients, particularly those influencing the neurological accords.

Platinum is an antidepressant. The memory improves, particularly when loss of memory is due to shock, anxiety, or stress increase, and there can be a sharp improvement in interpreting such inner experiences.
